

## Bryn Mawr College Monographs Volume 12; Reprint Series

By Bryn Mawr College

Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*. This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1922 Excerpt: .for the normal eye. One of the writers1 mentioned several years ago in a partial report of a somewhat extensive investigation of the color sensitivity of the peripheral retina that small areas could be found in the periphery of the normal retina showing characteristics for the colors red, green, yellow and blue similar to the Schumann case for red and green. That is, areas may be found which are totally blind or deficient to one of these colors so far as the positive response is concerned, but which seem not to be correspondingly deficient in the after-image and complementary or cancelling reactions. In fact, so far as can be told, the after-image and complementary reactions are no different in these areas from those in the immediately adjacent normal portions of the retina. We found it infeasible to test for a contrast reaction in these comparatively small...
