

## Laboratory Bulletin Volume 1-14

By Oberlin College

Rarebooksclub.com, United States, 2013. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*. This historic book may have numerous typos and missing text. Purchasers can usually download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1893 edition. Excerpt: .end of the first week in October. Grackles were found at the Oberlin roost from May 16 until the end of the second week in October--a difference of nearly four weeks between the two species. Mr. Brewster describes the woods occupied by the robins as a point toward which the host converged from all directions, singly or in small companies. The grackles approached their roost from one direction only, and arrived in larger or smaller flocks. The feeding habits of the robin are therefore different from those of the grackle. Sometimes the robins were almost equalled in numbers by other species which shared the roost with them. But the grackles far outnumbered all the other species seeking the protection of their roost. The fact that many robins rear two broods in a season and that the grackles rarely if ever rear more than one...
