In the not-too-distant future, in a country covered by state-sized office complexes, one man goes on a dangerous quest . to find a new office chair. Publishers Weekly (April 2013): Set in the year 2169, this inventive novel takes corporatocracy to its logical extreme, but goes askew at the end. Avery has lived within the sealed walls of Naperville for over 30 years, subsisting on fabricated food earned with fun bucks and the occasional powdered beer. The multi-firm structure s grand opening is imminent, assuming it can withstand sabotage from rivals and accelerating attacks from the Outsiders whose trade routes are threatened. Endearing aliens and political satire make this a fun read, even if the final chapter seems irrelevant. Avery s evolution and chair quest...
