The digital divide is a term that has been used to characterize a gap between information haves and have-nots, or in other words, between those Americans who use or have access to telecommunications technologies (e. g. , telephones, computers, the Internet) and those who do not. One important subset of the digital divide debate concerns high-speed Internet access, also known as broadband. Broadband is provided by a series of technologies (e. g. cable, telephone wire, fiber, satellite, wireless) that give users the ability to send and receive data at volumes and speeds far greater than current dial-up Internet access over traditional telephone lines. Broadband technologies are currently being deployed primarily by the private sector throughout the United States. While the numbers of new broadband subscribers continue to grow, studies conducted by the Federal Communications Commission (FCC), the Department of Commerce (DOC), and the Department of Agriculture (USDA) suggest that the rate of broadband deployment in urban and high income areas may be outpacing deployment in rural and low-income areas. Some policymakers, believing that disparities in broadband access across American society could...
