

Ecology, behaviour and conservation of the charrs, genus *Salvelinus*

Filesize: 2.52 MB

Reviews

This kind of book is every little thing and made me searching ahead of time plus more. This is certainly for anyone who statte that there was not a well worth reading through. Its been developed in an remarkably straightforward way in fact it is simply following i finished reading this pdf in which really modified me, alter the way i really believe.

To read **Ecology, behaviour and conservation of the charrs, genus *Salvelinus*** eBook, you should refer to the button beneath and download the ebook or have accessibility to other information that are have conjunction with ECOLOGY, BEHAVIOUR AND CONSERVATION OF THE CHARRS, GENUS *Salvelinus* ebook.

Springer Jul 2002, 2002. Buch. Book Condition: Neu. 254x178x28 mm. This item is printed on demand - Print on Demand Neuware - *Salvelinus* species are one of the most thoroughly studied groups of fishes. Many reasons explain this intense interest in charr biology. Charrs have a Holarctic distribution encompassing many Asian, North American, and European countries and occupy diverse marine and freshwater environments. Furthermore, the current distribution of charr includes areas that were directly influenced by climate and topographic change associated with the many Pleistocene glaciations. Undoubtedly, these conditions have promoted much of the tremendous morphological, ecological, and genetic variability and plasticity within *Salvelinus* species and they make charr very good models to study evolutionary processes 'in action'. Many charr species also exhibit demographic characteristics such as slow growth, late maturity, and life in extreme environments, that may increase their susceptibility to extinction from habitat changes and overexploitation, especially in depauperate aquatic habitats. This vulnerability makes understanding their biology of great relevance to biodiversity and conservation. Finally, charr are of great cultural, commercial, and recreational significance to many communities, and their intimate linkage with human societies has stimulated much interest in this enigmatic genus. This volume comprises a selection of papers presented at the fourth International Charr Symposium held in Trois-Rivières (Québec, Canada), from 26 June to 1 July 2000. It includes 31 papers on ecological interactions and behaviour, trophic polymorphism, movement and migration, ecophysiology and evolutionary genetics, ecological parasitology, environmental stress and conservation. These studies cannot cover all recent developments in the ecology, behaviour and conservation of *Salvelinus* species, but collecting them into a special volume should bring attention to current research on this important genus and stimulate further work on *Salvelinus* species. 364 pp. Englisch.
